OUR PRODUCTS

We have a wide range of lab related products and a good track record to boot.

Bioscope are experts in the supply of laboratory equipment to a wide range of industrial, life science and water testing laboratories.

We also supply to Scientists, Engineers and Consultants, in scientific research, quality assurance, water monitoring and testing of manufacturing processes. We add value to the products we sell by utilising our experience and expertise, and providing on-going application and technical support.

Superior Service

Bioscope's aim is to differentiate ourselves and add value to our customers, by providing superior service throughout the sales and after-care processes. This added value is created by understanding the business challenges, identifying the commercial opportunities, utilising our resources and technical expertise to design improved systems and products to deliver the desired outcome.
